OFENTSE MILES MAPHETO
ASSIGNMENT 2
PRG 251

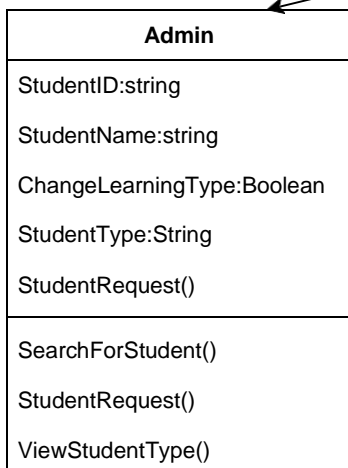

After the registration we will provide the student with the Username and also they will use their password they created

Login will inherit from the registration class but only "username"/"password"

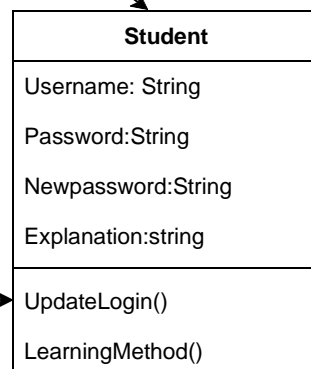

A Field will be added into the database, to let us know if the user that logged in is a admin or student

Will inherit the method for updating credentials

Learning Method will be about inserting data into the database

Why we inherit username and password: It's for the updating the database.

Method for updating the passwords/ Username
Will inherit the username and password.
